DAVAO CITY TRANSPORT ROADMAP

With a population of more than **1.7 million**, Davao City has

1 bus terminal

5 van terminals

1 airport

2 public ports

18 private ports

72 pedestrian bridges

69 traffic signals

80% of trips using public transport

With the population estimated to exceed **2 million by 2028**, our transport system must be able to support this growth.

How can we enhance connectivity and improve the quality of life of all Davaoños using our transport system?

Vision

With the Davao City Transport Roadmap, we will become a model city for the Philippines through our safe and sustainable transport system.

What's next?

How do we achieve this?

Pampublikong sakyanan

Efficient, reliable, and integrated public transport system

- Develop and implement a public transport plan that supports and integrates existing and future modes (e.g. High Priority Bus System and proposed railway systems)

Walking ug biking

Safe and viable mode of transport for short trips

- Improve pedestrian facilities and infrastructure
- Prioritise people over parking private cars on streets
- Establish bike network

Kargamento

More efficient movement of goods

- Improve traffic management across the city
- Establish new logistics centers

Pribadong sakyanan

Defined functions and regulations per street in Davao City

- Ensure private vehicle use is maintained at its current low levels
